

Prompt Structuring for Image Generation

A prompt can be as simple as “a happy dog”

to something complex, like “a very cute fluffy dog, with an expression of joy and hope, in the style of steampunk, as painted by Cezanne, photorealistic and highly detailed.”

When we provide prompting; as AI reads it, it will understand specific things given in such brackets. Such inputs ensure maximum accuracy in the results AI provides us.

Similar symbols are commonly used in both scripting and coding. Similarly, Python is primarily the technological language used for creating AI tools. Therefore, by using these symbols, we are precisely instructing the AI about the prompts we provide.
